n December beauite accurate, to the accurate acc	cause it hasn't had sufficient holiday season training examples. The predictions generally are hough! onality			

The forward pass is correctly implemented for the network's training.

12/2/2019 Udacity Reviews

The run meth	nod correctly produces the desired regression output for the neural network.
Correct!	
ackward P	Pass
The network change.	correctly implements the backward pass for each batch, correctly updating the weight
Correct!	
Updates to bo	oth the input-to-hidden and hidden-to-output weights are implemented correctly.
	neters
yperparar	neters of epochs is chosen such the network is trained well enough to accurately make predictioerfitting to the training data.

12/2/2019 Udacity Reviews

The training loss is b	low 0.09 and the validation l	oss is below 0.18.	
Correct!
